

API Schema

Sunday, August 16, 2026 10:39 PM

API Name	Purpose / What It Provides	Example API Call	Key Notes
Submissions API	Returns an entity's full EDGAR filing history, including metadata such as current/former names, ticker symbols, and exchanges .	https://data.sec.gov/submissions/CIK####.json	Contains at least 1 year or 1,000 most recent filings; older filings split into additional JSON files with date ranges .
XBRL Company Concept API	Returns all XBRL disclosures for a single company and a single concept (taxonomy + tag) with facts grouped by units of measure (e.g., USD, CAD) .	https://data.sec.gov/api/xbrl/companyconcept/CIK/taxonomy/tag.json	Aggregates facts across filings using non-custom taxonomies (us-gaap, ifrs-full, dei, srt) for consistency .
XBRL Company Facts API	Returns <i>all</i> company concepts for a single company in one JSON file .	https://data.sec.gov/api/xbrl/companyfacts/CIK.json	Includes every concept and fact disclosed using standard taxonomies.
XBRL Frames API	Aggregates one fact per reporting entity for a specific calendar period (annual, quarterly, instantaneous) .	https://data.sec.gov/api/xbrl/frames/us-gaap/AccountsPayableCurrent/USD/CY2019Q11.json	Period formats: CY#### (annual), CY####Q# (quarterly), CY####Q#I (instantaneous) . Aligns facts to calendar periods even if company fiscal calendars differ Current pageCurrent page. Because company financial calendars can start and end on any month or day and even change in length from quarter to quar....
Bulk ZIP Archives	Provides nightly-compiled ZIP archives containing all submissions or all XBRL facts for large-scale data ingestion .	Submissions ZIP: https://www.sec.gov/Archives/edgar/daily-index/bulkdata/submissions.zip Company Facts ZIP: https://www.sec.gov/Archives/edgar/daily-index/xbrl/companyfacts.zip	Updated nightly around 3:00 a.m. ET . Most efficient method for bulk downloads.

Additional Important Notes

Real-Time Updates

- Submissions API: typically <1 second delay
- XBRL APIs: typically <1 minute delay
- Delays may increase during peak filing periods.

CORS

- data.sec.gov **does not support CORS**; server-side or backend calls are required for browser-based apps .

No Authentication Required

- All APIs are public and require **no API key**
